

Bypass (Dimmer) [55]

Bypass for dimmer light switch

Seamless performance for low-power lamps

Bypass (Dimmer) [55] optimizes the operation of dimmer light switches by reducing the minimum lamp load power needed. It stops LED lights from flickering and allows connecting the low-energy bulbs. Compact and easy to install, it features long wires for convenient connecting.

Key features			
No more LED lights flickering	Connecting bulbs under 8 VA	Wires 9 cm in length	Easy to fit due to compact size

LightSwitch (Dimmer) Jeweller

Bypass (Dimmer) [55] is compatible with LightSwitch (Dimmer) Jeweller and third-party dimmers¹.

Easy installation

Engineered with professionals in mind, Bypass (Dimmer) [55] fits easily into a standard mounting box or a lighting appliance's junction box, allowing ample space for switch or lamp wiring. The 9 cm length of the wires ensures easy and convenient connection.

¹ Carefully read the manufacturer's instructions for third-party dimmer before connecting Bypass (Dimmer) [55].
